Professional Summary

Computer Science and Engineering student with hands-on experience in software development, Artificial Intelligence, Machine Learning, and Edge AI. Experienced in developing responsive web applications and AI-enabled systems through internships, academic projects, hackathons, and technical training. Seeking software engineering, full-stack development, AI/ML, or data-oriented roles to apply programming, problem-solving, and system-development skills.

Education

M. Kumarasamy College of Engineering, Karur	2024 - 2028
<i>B.E. Computer Science & Engineering</i>	CGPA: 7.77/10.00
Sowdaambikaa Group of Schools, Trichy	2023
<i>Higher Secondary Certificate (HSC)</i>	79%
St. Dominic Savio Matric Hr. Sec. School, Karur	2021
<i>Secondary School Leaving Certificate (SSLC)</i>	95%

Technical Skills

Languages:	Java, C, Python, JavaScript
Web:	HTML, CSS, React.js, Node.js, Express.js, Flask, REST APIs
AI / ML:	TensorFlow Lite, CNN, Librosa, NumPy, Pandas, Scikit-learn
Databases:	SQL, MongoDB, PostgreSQL
Tools:	Git, GitHub, VS Code, Docker, AWS
Core CS:	Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Internship Experience

Softrate Technologies Pvt. Ltd.	Jun 2026
<i>Web Development Intern</i>	Chennai
- Developed and enhanced responsive web interfaces for business productivity and financial utility applications. - Worked on Invoice Generator, Quote Generator, Receipt Generator, and Revenue Forecaster modules with interactive calculation logic. - Implemented routing, UI improvements, responsive layouts, and functional validation across 24 application pages. - Used Git and GitHub for source-code management and development workflows.	
CodSoft	Jul 03 - Jul 10, 2025
<i>Full Stack Development Intern</i>	Remote
- Developed responsive frontend components and implemented practical web-development features using HTML, CSS, and JavaScript. - Applied software-development and project-structuring concepts to assigned implementation tasks.	
InternPe	Jul 07 - Aug 03, 2025
<i>Web Development Intern</i>	Remote
- Developed functional web components using HTML, CSS, and JavaScript. - Implemented responsive layouts and strengthened practical frontend development skills through project-based tasks.	

Projects

SafeCare: AI-Based Context-Aware Smart Hearing Aid

2026

- Tech Stack: Python, TensorFlow Lite, Librosa, CNN, MFCC, Raspberry Pi Zero 2 W, INMP441 MEMS Microphones.
- Developing an Edge AI smart hearing-aid system for speech enhancement, environmental sound recognition, and safety alerts.
- Designed environmental sound classification for Speech, Horn, Siren, Music, Traffic, and Background Noise using MFCC features and a CNN model.
- Implemented adaptive noise suppression, speech enhancement, directional sound detection, and emergency sound prioritization using dual microphones and Raspberry Pi Zero 2 W.

AquaSentinel AI: Water-Borne Disease Early Warning System [GitHub]

2026

- Tech Stack: React.js, Flask, Python, REST API, JavaScript, Machine Learning, PWA, Git, GitHub.
- Developed an AI-enabled platform for community-level water-borne disease risk monitoring using health, water-quality, and rainfall data.
- Built a React.js frontend and Flask REST API for risk monitoring, prediction, alerts, and integration of health, water-quality, and rainfall data.
- Designed a mobile-first Progressive Web App with responsive navigation, offline-oriented functionality, and API-driven risk visualization.

Softrate Business Management Web Application [GitHub]

2026

- Tech Stack: React.js, JavaScript, HTML, CSS, Flask, Git, GitHub.
- Developed Invoice Generator, Quote Generator, Receipt Generator, and Revenue Forecaster modules for business productivity workflows.
- Implemented responsive UI, application routing, calculation logic, and interactive workflows across 24 application pages.
- Verified page functionality, routing, calculation logic, and result-display workflows throughout the application.

Certifications

- Oracle AI Vector Search Certified Professional - Oracle University
- Human Computer Interaction - NPTEL, Elite, 87%
- Pragati: Path to Future - Cohort 9 - Infosys
- AWS S3 Basics - Coursera Project Network
- ReactJS and Node JS - Unstop

Achievements & Activities

- TCS CodeVita Season 13 - Secured Global Rank 10,944.
- NPTEL Human Computer Interaction - Achieved Elite certification with a score of 87%.
- Participated in Electrathon'26 and SIMATS (TECH SANGAMAM-26), a National Level 24-Hour Hackathon.
- Participated in Elite Hack 1.0, a Global Online Hackathon.
- Participated in Adobe University Hackathon and Kurukshetra'26 - K!ODE WARS.
- Participated in TechZen Operation Cipher 2026 and Celesta'25 - 6-Hour Coding Hackathon.
- Completed DSA for DeepTech, an International Level Bootcamp.
